The Studio Hybrid fits perfectly in your world

More flexible than a typical PC, the Dell Studio Hybrid is an anywhere-you-want-it-desktop. Our smallest desktop, it looks great in the living room, on the desk, or anywhere else space is at a premium. And because sleeves are available in 6 colors or Bamboo, you know it'll match your sense of style. Best of all, it uses energy-efficient components, so you'll enjoy its power while helping to preserve the planet.

Transform your style

Go green without cramping your style. With the Studio Hybrid, personalization is easy with 6 interchangeable color sleeves or also one in bamboo. Now the only problem you face is picking out which color is right for you.

Powerful features

Small, sleek and muscular. The Studio Hybrid packs in big performance, high efficiency and the brains to back it up.

TV on your PC

With an optional digital/analog TV tuner, you are able to watch, pause and record live TV¹.

Slot load optical drive

Simply insert your CD or DVD into the optical drive to burn files, music and movies.

Work freely

Keep your work area clean with an optional wireless mouse and keyboard letting you move around without restriction. You even have the option of a WiFi network to give you flexibility of setting up your PC anywhere in your home.

What will you do with all that freedom?

Tread lightly

Studio Hybrid is Dell's greenest consumer desktop PC.

Size and materials

Our smallest design is about 80% smaller than standard desktops.

Power usage

Uses about 70% less power than a typical desktop.

Packaging

Studio Hybrid packaging is made from 95% recyclable materials.

**Simple and smart services****Dell DataSafe™**

Our online back-up service offers data protection by enabling customers to back-up data to a safe, remote storage site using a broadband connection. Dell DataSafe is easy, flexible and secure. Set up and forget it for backup of data and protection against software, hardware and catastrophic failure.

Dell Support Center

Our centrally located, easy-to-use application provides personalized support resources. Conveniently located on your PC's desktop with quick links to service, support and system resources. Helps keep your system up-to-date and running efficiently through automated fixes for common configuration issues.

DellConnect™ Remote Assistance

Simplifies troubleshooting and repair by enabling a Dell service associate to access, diagnose and support customers over the Internet.
